

We help the long-range shooter overcome the mediocrity of mass-produced rifles with our top tier chassis, accessories and complete rifles.

KRG was established conceptually in 2005 by a group of then active duty Army Special Forces soldiers. Being both professional and sport shooters, their passion led them to a deep understanding of the strong and weak points in the fielded equipment. They were not satisfied with the small arms or accoutrements available. Many products were only barely acceptable and, although some were very good, there was clearly a need for evolutionary enhancements as well as completely new products.

Philosophy:

In our designs, we work with a few basic premises, the fulfillment of which will lead to what we believe is the best possible product:

- A durable, attractive, innovative design that meets functionality requirements and balances cost, complexity, and features yields the best possible product.
- Design meets relevant functionality criteria.
- Functionality criteria are made relevant through input from end users and small arms professionals (not mutually exclusive).
- Cost is not exorbitant compared to similar products (we reserve the right to make one-off, fun, or ridiculously expensive items made of exotic materials at our discretion).
- Modularity is emphasized, though considered against cost, complexity and weight.
- Necessary features are incorporated, advance features are incorporated when the weight/cost penalty is not too high, superfluous features are discarded.
- Complexity is kept to a minimum to increase durability and manufacturability and to control cost.
- Product is durable as determined by in-house and end user testing.

Finally, some of our thoughts on innovation:

Many companies claim to innovate. The truth is that for many decades there have been few true innovations in the field of small arms. At best most companies can offer small evolutionary refinements in materials or cost or usability, etc. These refinements are not great innovations and you will not see us trumpeting them as such. At KRG, we use what works and has worked for many years. When a problem arises which necessitates innovation, we pour massive effort into a quality solution.

KRG
KRG-OPS.com

Our primary chassis line is broken up into four tiers: the Bravo, the X-Ray, the Whiskey-3 and the C-4.

C-4 CHASSIS

C-4 is our purpose built chassis with direct feedback from top competitors and trainers the C-4 is the epitome of the modern competition rifle chassis. With sought after features this chassis is designed to fit the shooter for maximum comfort and repeatability.

Tool-less length-of-pull

Adjustable cheekpiece height

Monolithic aluminum construction

Three options for removable barrel shroud

Accepts receivers with trigger hangers

16 3/4" extended forend

Integral full length ARCA rail

Adjustable mag height and tension accepts AICS and AW magazines

Mounting points for weight customization

Tool-less recoil pad height and cant

Adjustable height bag rider

Removable trigger finger rest grip with emphasized thumb rest

New multi-platform Δ-Lug mounting systems

Extra tall mag fence / barrier stop

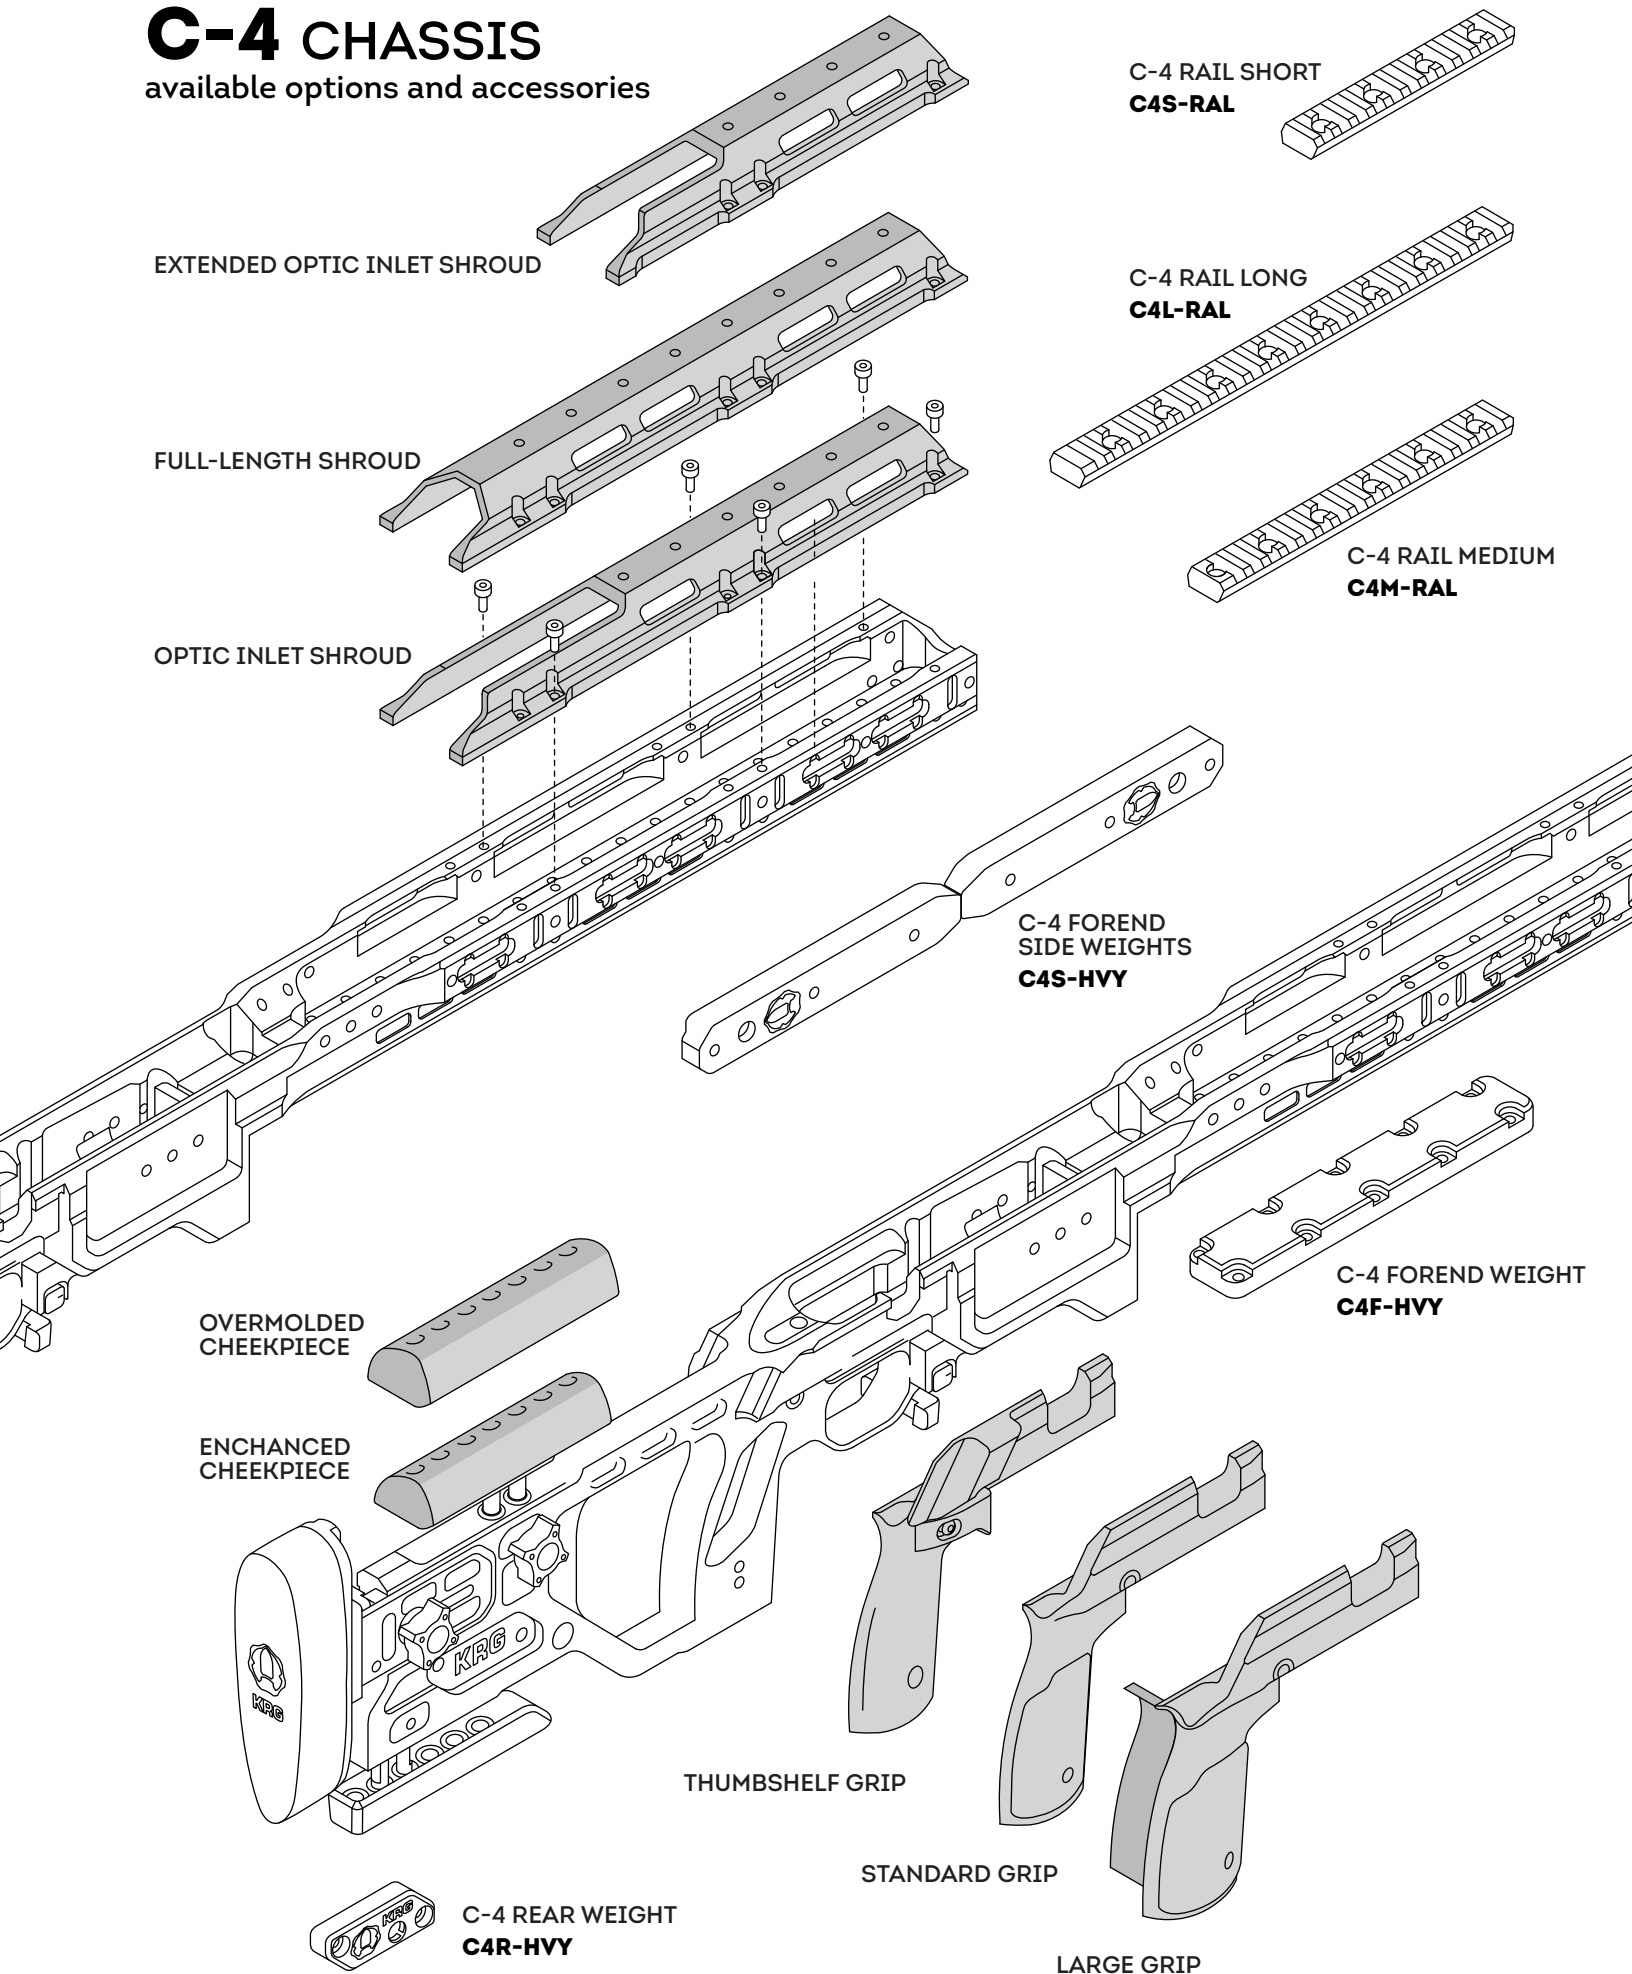

Two round quiver mounting point

Weight: 6.3lbs
Color: Black

It is available for the following rifles:
Remington 700 Short and Long Action (and Left Handed SA Chassis)
Tikka T3/T3x/CTR (Short Action calibers only)

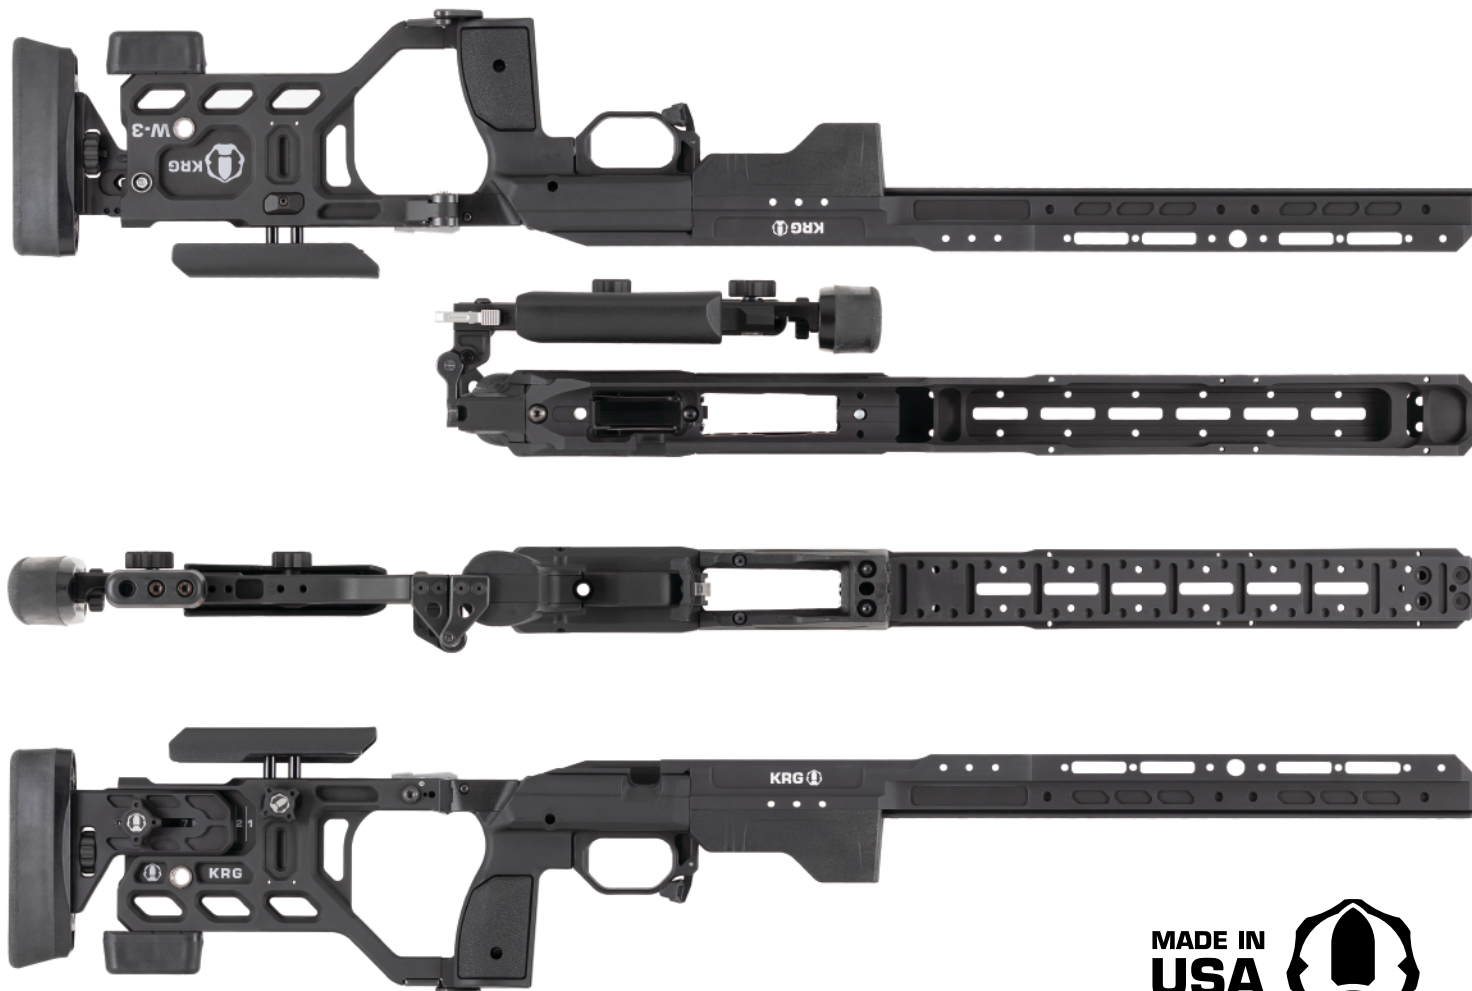

C-4 CHASSIS

available options and accessories

WHISKEY-3 PRO CHASSIS

NEW

**MADE IN
USA**

Introducing the Whiskey-3 Pro, our flagship chassis system. Combining elements of the Whiskey-3 and C-4 chassis into one system with the features many have been asking for. The new monolithic aluminum front end combines our traditional backbone with an extended forend featuring an integrated ARCA rail and M-Lok mounting points at the 3, 6, & 9 o'clock positions. The back end features an all new cheekpiece with more adjustment points and a redesigned buttstock mounting plate for a tighter lockup. The folding version can be configured to fold to the left or the right.

Whiskey-3 Shroud available

4.8 oz

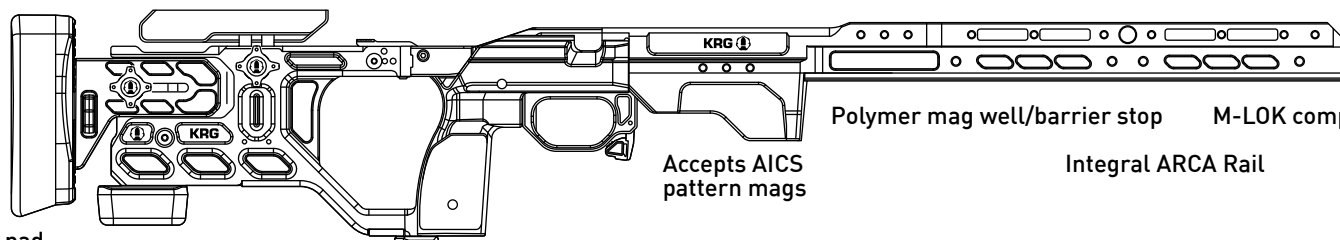

Tool-less length of pull,
buttstock height
and cant adjustment

Tool-less reversible cheekpiece height adjustment

Lateral and longitudinal cheekpiece positioning

Monolithic aluminum frontend

CNC Radius action bedding plus free floated barrel

KRG recoil pad
light, durable,
and comfortable
to shoot

Reversible
folding hinge

Quick interchangeable
grip size panels

Polymer mag well/barrier stop

M-LOK compatible

Integral ARCA Rail

Weight: 3.85 lbs fixed; 4.1 lbs folding
Color: Black

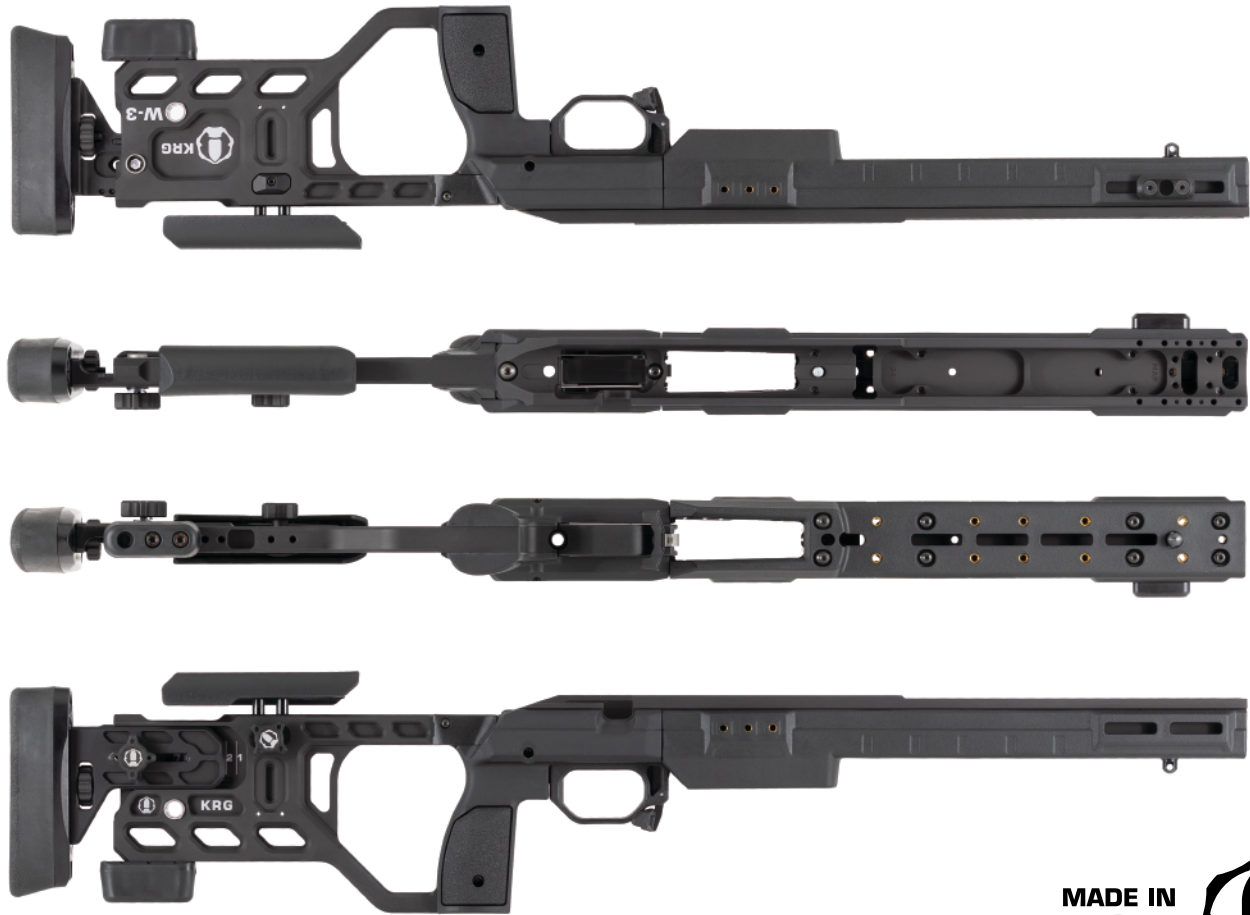

Available in **fixed and folding stock versions** for the following rifles:

Remington 700 Short and Long Action (and Left Handed SA Chassis)

Tikka T3/T3x/CTR (Short Action calibers only)

WHISKEY-3 CHASSIS

NEW GEN 7

**MADE IN
USA**

The Whiskey-3 is our premier chassis available for your bolt action precision rifle. It combines precise aluminum bedding with tool-less adjustments, durability, and superior ergonomics. Numerous types of accessories are available and can be added to attachment points along the chassis, including barrier stops, sling mounts, weights, rails, and many more.

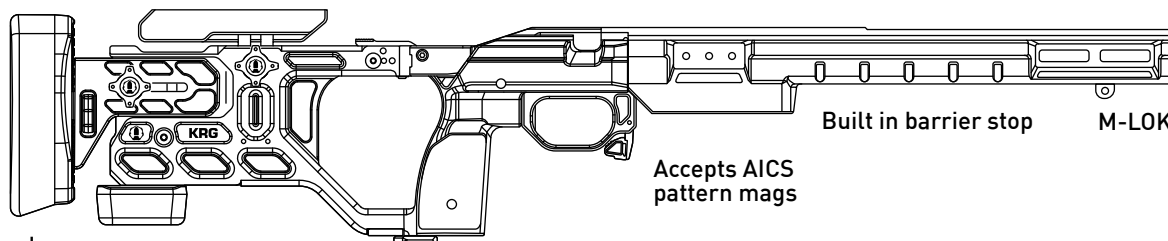

Tool-less length of pull,
buttpad height
and cant adjustment

Tool-less reversible cheekpiece height adjustment

Lateral and longitudinal cheekpiece positioning

Full length aluminum backbone

CNC Radius action bedding plus free floated barrel

Built in barrier stop

M-LOK compatible

Accepts AICS
pattern mags

KRG recoil pad
light, durable,
and comfortable
to shoot

Reversible
folding hinge

Quick interchangeable
grip size panels

Weight: 3.75 lbs fixed; 4.05 lbs folding
Color: Black, FDE, Sako Green, Stealth Grey

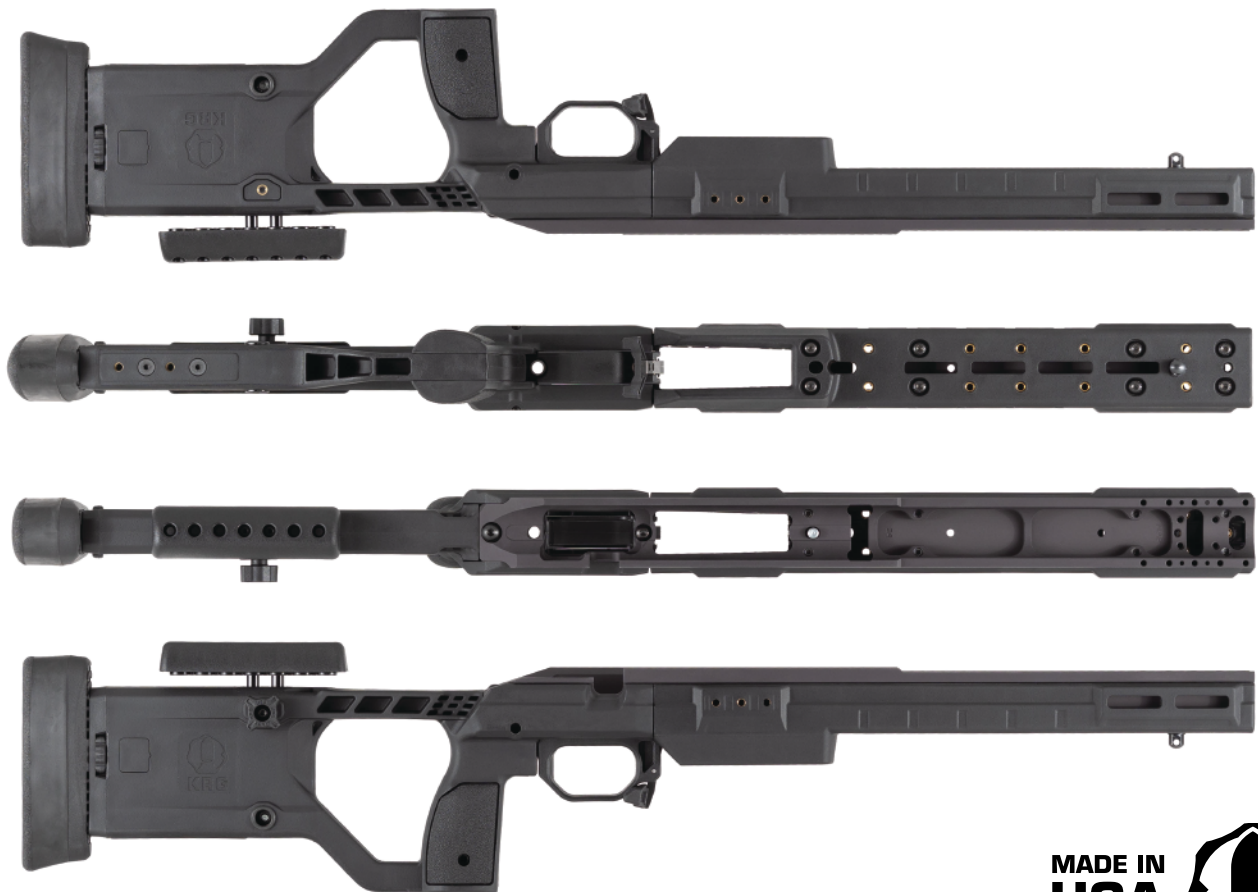

Available in **fixed and folding stock versions** for the following rifles:

Remington 700 Short and Long Action (and Left Handed SA Chassis)

Tikka T3/T3x/CTR (Short Action calibers only)

HOWA 1500 SA

X-RAY CHASSIS

**MADE IN
USA**

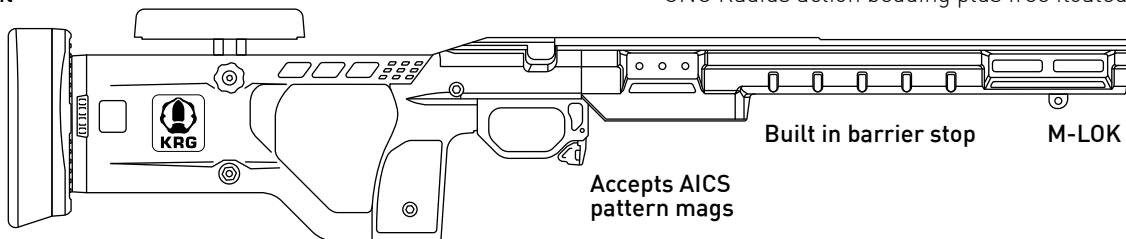

The X-Ray offers unprecedented value with its light weight, competitive price, and nearly identical ergonomics to the Whiskey-3. To accomplish all this we kept the features that everyone wants and needs and eliminated those that weren't necessary. The end result is a hybrid aluminum and polymer chassis that we know you'll love.

Tool-less buttpad height
and cant adjustment

Tool-less cheekpiece adjustments
with ambidextrous thumbscrew

Full length aluminum backbone
CNC Radius action bedding plus free floated barrel

KRG recoil pad
light, durable,
and comfortable to shoot

Adjustable length of pull
includes 3 spacers and the hardware
to mount either 1, 2, or 3 allowing
a max LOP of about 14" more spacers
available for longer LOP

Quick interchangeable
grip size panels

Accepts AICS
pattern mags

Built in barrier stop

M-LOK compatible

Weight: **3lbs**
Color: **Black, FDE, Sako Green, Stealth Grey**

It is available for the following rifles:

Remington 700 Short and Long Action (and Left Handed SA Chassis)

Tikka T3/T3x/CTR (Short Action calibers only)

BRAVO CHASSIS

**MADE IN
USA**

The Bravo provides you with the essential benefits of a chassis combined with conventional target/varmint stock ergonomics all at a modest price. Featuring the adjustments you need to fit your frame and plenty of modularity for future upgrades, the Bravo is a home run for the beginner or the hardcore enthusiast alike!

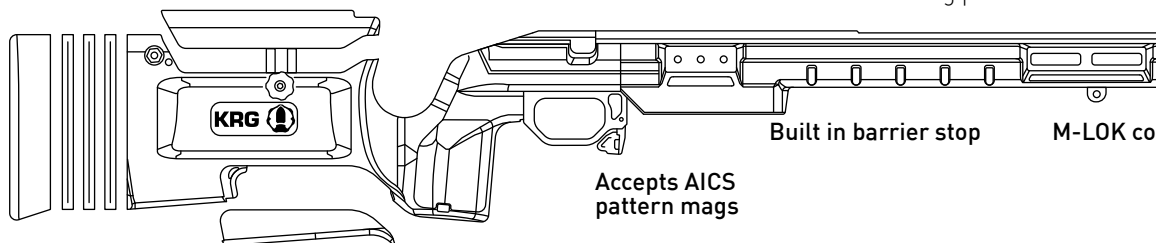

LOP = 12 7/8" – 14"
or up to 15 1/8"
with 6 spacers

Adjustable tool-less cheekpiece

Full length aluminum backbone

CNC Radius action bedding plus free floated barrel

KRG recoil pad
light, durable,
and comfortable
to shoot

Built in barrier stop

M-LOK compatible

**Accepts AICS
pattern mags**

Adjustable length of pull
includes 3 spacers and the hardware
to mount either 1, 2, or 3 allowing
a max LOP of about 14" more spacers
available for longer LOP

Integrated butthook with cover
continuous angled lower surface
or a "butthook" configuration

Weight: 2.9lbs
Color: Black, FDE, Sako Green, Stealth Grey

It is available for the following rifles:

Remington 700 Short and Long Action (and Left Handed SA Chassis)

Tikka T3/T3x/CTR short action calibers (using AICS mags only)

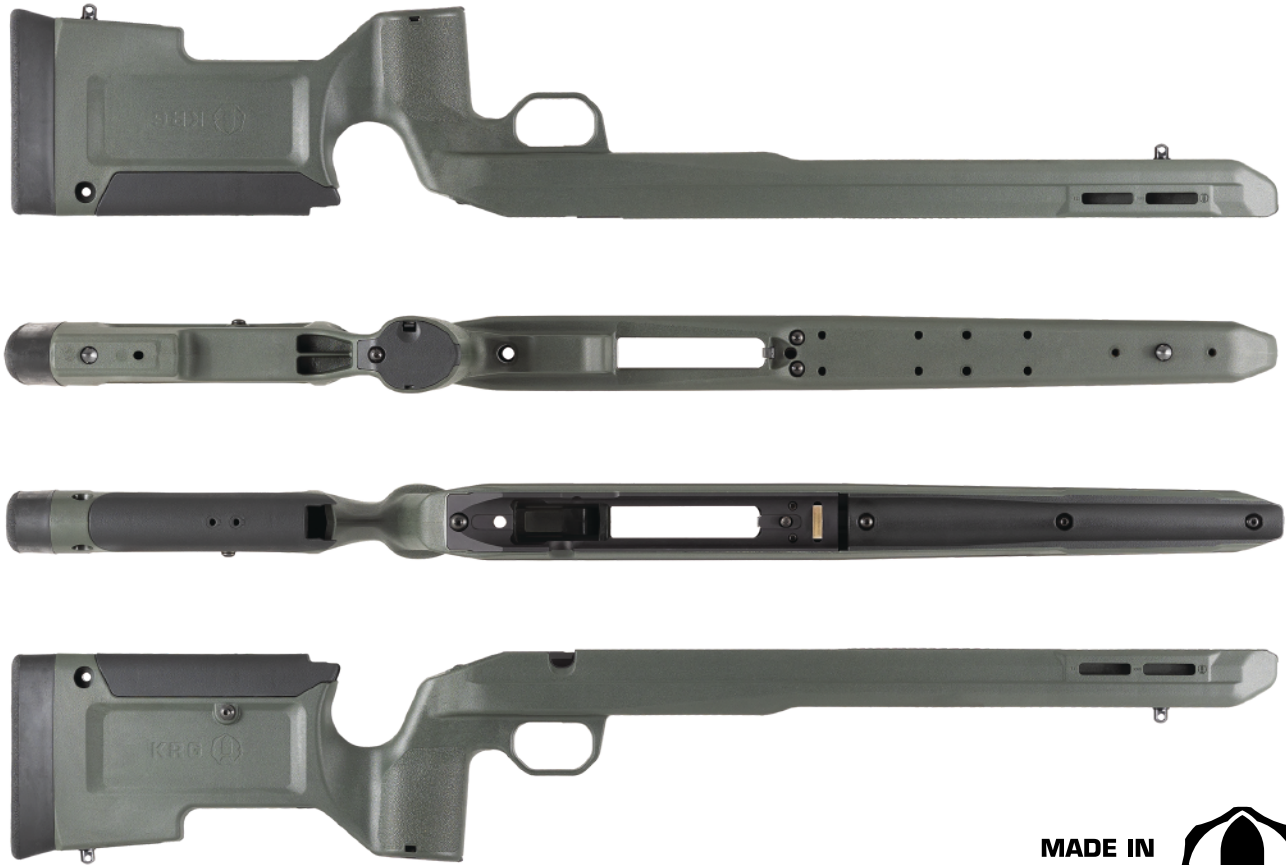

Tikka T3/T3x/CTR short action calibers (using CTR mags only)

Howa 1500 short action

Ruger American and Savage SA

Rimfire: Tikka T1x and CZ-457

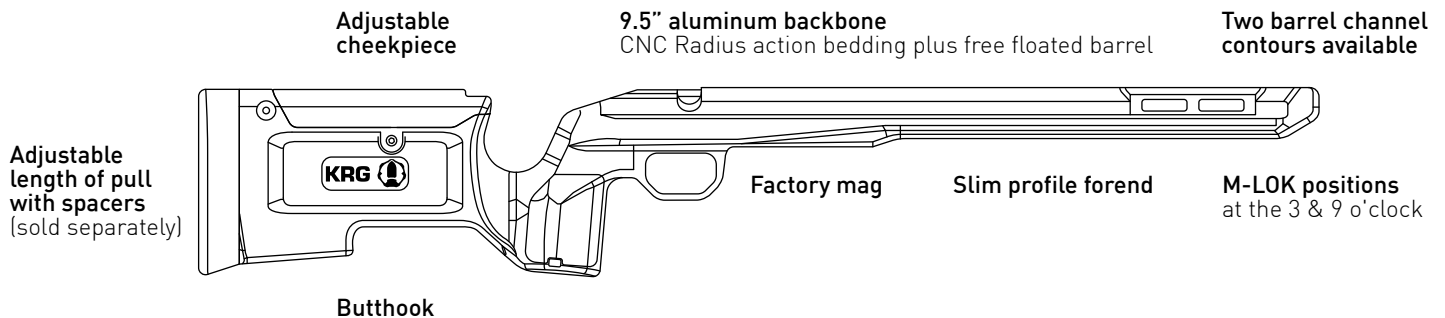

ECHO CHASSIS for TIKKA T3/T3x

**MADE IN
USA**

You asked and we listened – KRG proudly introduces the Echo, our first chassis specifically developed to be compatible with Tikka T3 in both short and long action chamberings. The Echo maintains the superior ergonomics of our popular Bravo chassis in a streamlined, carbon-fiber reinforced polymer unibody. The refined design is lightweight, has fewer parts, and accommodates both short and long action cartridges, making it ideal for long range hunting and general-purpose use. So, whether you're looking to bring our exceptional ergonomics to your factory Tikka, or you just want a solid platform on your next hunt, the KRG Echo chassis will deliver the superior performance you've come to expect from KRG.

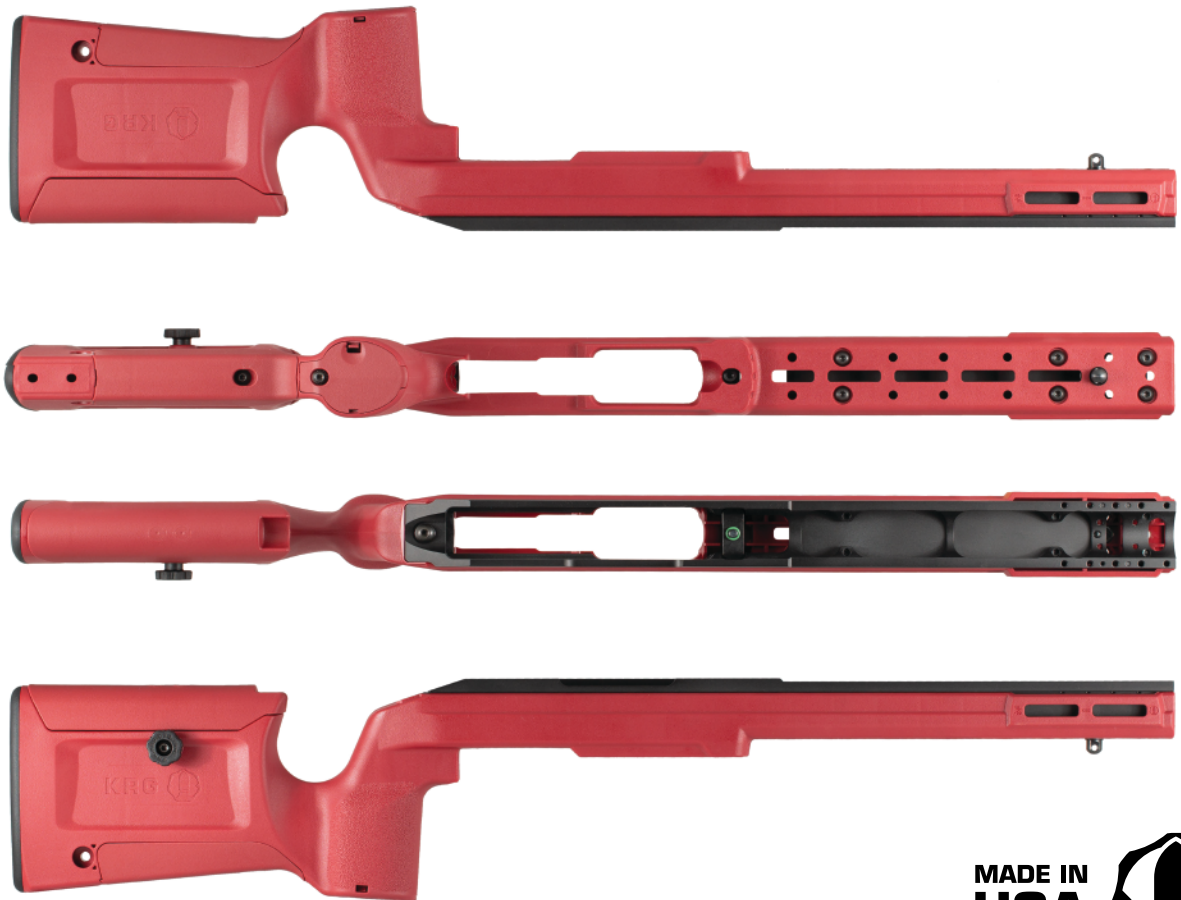

Available for the following rifles:

Tikka T3x Short and Long Action

Price: **\$299**
Weight: **2.65lb**
Color: **Black, Carbon Forest**

10/22 BRAVO CHASSIS

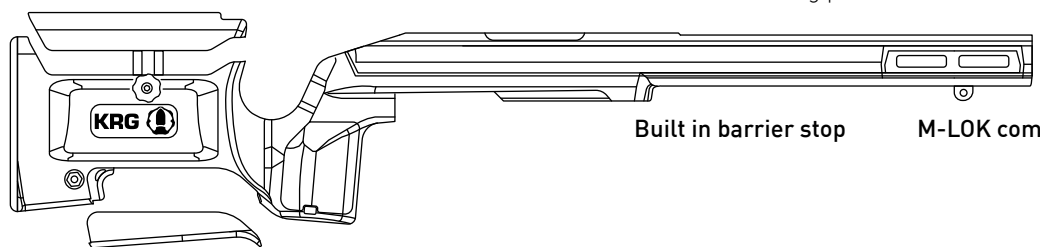

Designed to fit your favorite Ruger 10/22 for that dream build you've always wanted. Featuring the same great ergos as the standard Bravo but with a slightly shorter minimal LOP (~11.25") for shooters of all sizes. For those of you over thinkers out there, don't worry, the cheek piece position is still the same as our standard Bravo.

Adjustable tool-less cheekpiece

Full length aluminum backbone
CNC Radius action bedding plus free floated barrel

11 1/4" minimum LOP

Built in barrier stop

M-LOK compatible

Adjustable length of pull

includes 3 spacers and the hardware to mount either 1, 2, or 3 allowing a max LOP of about 14" more spacers available for longer LOP

Integrated butthook with cover
continuous angled lower surface or a "butthook" configuration

Weight: 2.4lbs

Color: Black, FDE, Stealth Grey, Crimson Red

It is available for the following rifles:

Ruger 10/22

ACCESSORIES

Spigot Mounts – Primarily designed to move the bipod closer to the bore and 4 to 5 inches closer to the muzzle.
